

Lanner the woodfairy

In this game you are playing a light fairy, who is trying to free her forest from dark shadow creatures that have taken over.

The fairy encounters shadow monsters and tries to defeat them. The more creatures she beats, the more light is returning to the forest and her powers grow.

She can decide whether to plant flowers of light and regain more attack power or increase her inner light to strengthen her defences. When she has defeated as many monsters as possible, she will be strong enough to face the evil necromancer responsible for plunging the forest into darkness.

Controls

Controller

Right stick camera controll

Left stick character movment
